CHANGES IN 2025

● 2024 ● 2025

There were no changes in emergency shelter data between 2024 and 2025.

AGE

Homelessness disproportionately affects middle-aged adults.

130
(29%)

Emergency
Sheltered

153
(34%)

Unsheltered

77
(17%)

Transitional
Housing

92
(20%)

Public
Systems

130 people stayed in emergency shelter, domestic violence shelter, or youth shelter for emergency accommodation.

At least 153 people stayed in unsheltered locations such as a public park, bus shelter, a tent, or a car.

77 people experiencing homelessness stayed in transitional housing and would otherwise have been unhoused.

92 people stayed in institutional settings with no permanent home to return to. This includes correctional facilities, hospitals, and treatment centres.

Includes **31 children** under the age of 16 who were staying in an emergency shelter.

GENDER IDENTITY

62%

37%

Gender
Diverse
1%

Men Make Up **66%** of the unsheltered homeless population and **77%** of those in transitional housing

This highlights the need for targeted solutions that specifically support homeless men.

INDIGENOUS IDENTITY

Indigenous identity is highly represented in unsheltered homelessness **43%**

35% of the enumerated homeless population self identified as Indigenous

This highlights systemic inequities and the need for culturally appropriate housing solutions.
